PROJECTS

- 🕒 **Online Attorney Appointment Scheduling Software.**
Artificial Intelligence | August-December
 - This project is to schedule the appointment of lawyer based on their availability ,budget and the type of case they deal with.This is a basic project.
- 🕒 **Financial Management Assistance.**
Machine Learning Techniques | January-June
 - This project delineates the creation of a technologically advanced Personal Finance Assistant,integrating multifaceted functionalities, encompassing expense tracking, bill reminders,automatic categorization, and financial goal tracking.
- 🕒 **Detecting Counterfeit Money.**
Deep Learning Techniques | July-November
 - The proposed method involves pre processing the images of banknotes and then using a Convolutional Neural Network (CNN) to extract features. The CNN is trained on a large dataset of genuine and counterfeit banknotes to learn the underlying patterns of genuine notes and distinguish them from fake ones.
