SUMMARY

AI-ML student with strong programming skills in Python and Java. Passionate about NLP and deep learning, with hands-on experience in emotion detection and face recognition. Seeking opportunities in data science and AI development.

EXPERIENCE

Project – Emotion Detection in Text (NLP)

- Built an emotion detection system using Hugging Face Transformers
- Developed a flask backend and integrated it with a basic React based UI
- Used pre-trained models for text classification to detect emotions
- Tech Stack : Python, Flask, React.js, Hugging Face, Jinja2

Project – Automated Attendance System (Deep Learning)

- Developed an automated attendance system using Face Recognition to mark attendance efficiently.
- Utilized CNN and Deep Learning models for face detection and recognition.
- Implemented a real-time attendance logging system, storing data in a CSV file and sending email notifications.
- Tech Stack: Python, OpenCV, TensorFlow, CNN, Deep Learning

Project – Voice Based Virtual Assistant (Machine learning)

- A virtual assistant, which follows the user's spoken commands through a microphone and performs requested tasks
 - Used speech recognition module, Natural Language processing, and some machine learning algorithms
-

EDUCATION

Malla Reddy University | 2022–2026

Bachelor of Technology in AI-ML

- GPA: 8.94 (upto 3-1)

IIT Guwahati | Jan 2025 – Sep 2025

Minor Degree in Data Science

Rajiv Gandhi University of Knowledge Technologies IIIT| 2022–2026

Pre University Course MPC

SKILLS

HTML , CSS
Javascript
Java Programming
Python Programming
MySQL
NLP
Machine Learning
Deep Learning

CERTIFICATES

Elite in Java Programming
NPTEL

AI for everyone
Programming for everyone
HTML, CSS and Javascript
Coursera

LANGUAGES

English
Telugu
Hindi
